DETAILED ACTION

1. This application is in condition for allowance except for the following formal matter formal matters:

Specification is objected because claim 35 recites, in lines 1-3, "receive from telephony device a second image containing the objected and to further identify the object as function of data contained in both images". This limitations lacks support in the specification. Provisional application 60/24695, page 6, paragraph 5.2, last sentence states: If there is no match within a specified tolerance, then a message is returned indicating this situation, and the user is advised to try to re-image under better conditions". Such statement does not mean identify the object as function of data contained in both images because data is identified based on second image. As stated by the Applicant in remarks/arguments received on 4/7/2005, originally filed claim 22, which recites "A method for identifying a multi-dimensional object from at least one digitally captured image. The "at least one" language necessarily means that applicant was at least contemplating identifying an object using two images. Originally filed claim 22 has been canceled and Applicant is required to provide claim language support in the specification.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.
